U.K. and much of the research has been carried out by the Lundy Field Society. The Society is a registered charity (no. 258294) that has as its aims the study of the history, natural history and archaeology of Lundy, and the conservation of its

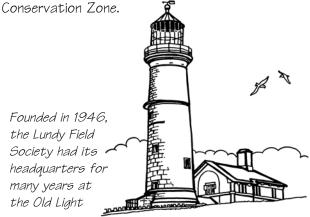

wildlife and antiquities.

WHAT'S SPECIAL ABOUT LUNDY?

UNDY IS UNIQUE in many ways. It is home to an unusual range of plants, birds and other wildlife and, having suffered little disturbance, it offers special opportunities for study and research.

The island has a long and interesting history, with Bronze Age settlements, rare early Christian grave stones, a medieval castle and the remains of Victorian granite quarries. There is also a lot more architecture than you might expect!

There are 41 scheduled sites and monuments and 14 listed buildings. Much of the island is a Site of Special Scientific Interest (SSSI). The surrounding seas are the U.K.'s first Marine Nature Reserve and a Special Area of Conservation. In 2003, part of the Reserve became the first No-Take Zone where removal of marine life is banned, and in 2010 the Reserve was rebranded as the U.K.'s first Marine

THE LUNDY FIELD SOCIETY (LFS) was founded in 1946. 'Field studies' is a less-used term today than it was then, but the LFS continues its objectives of researching the island's wildlife and habitats – terrestrial and marine – along with its geology, archaeology and history.

The Society encourages study into all aspects of Lundy and offers modest research grants. A logbook is maintained in the Tavern in which visitors and islanders are encouraged to enter observations, and bird ringing is carried out seasonally by trained, licensed volunteers. Some LFS members contribute directly to the conservation and maintenance of the island by coming on volunteer working holidays.

The LFS produces many publications, both regular ones for members, and books and leaflets for the general public. The ANNUAL REPORT details the work carried out on the island each year; the JOURNAL OF THE LUNDY FIELD SOCIETY contains peer-reviewed research papers; and the annual BULLETIN has articles on a variety of Lundy topics and updates on island and LFS news.

The Society also maintains a library on the island for the use of members and islanders.

Its elected committee members have a wide range of interests, skills and experience, and as well as our research and publishing activities, we act for the well-being and long-term conservation of Lundy. Most recently, that included working with a range of organisations for the restoration of the church building and development of the nave into a multipurpose centre.

The Society is part of the LUNDY MANAGEMENT FORUM, a partnership between the National Trust, which owns Lundy, the Landmark Trust, which manages the island, and other organisations with particular roles and expertise. They include the Devon and Severn Inshore Fisheries and Conservation Authority, English Heritage, the Environment Agency, Natural England, the Royal Society for the Protection of Birds and the Lundy Marine Conservation Zone Advisory Group. The LFS provides the secretariat for this last body.

The Lundy Field Society works with the island management. As well as providing volunteers for working holidays to assist the Lundy Conservation Team, we organise occasional events on the island which are open to our members, to islanders and to visitors.

The LFS website at www.lundy.org.uk is regularly updated and is a steadily expanding resource on all aspects of Lundy. Details of our publications can also be found there.

S WELL AS HELPING to study and improve Lundy, the LFS has a strong social side. Many of our members have no particular specialism or research interest and for them the LFS is a way of keeping in touch with fellow enthusiasts and extending their knowledge and enjoyment of this special place.

Nothing shows this better than the Annual General Meeting, held in Crediton in March, where members enjoy reports from the Island Manager and Warden and other talks by experts; renew acquaintances; often join in an auction of Lundy items; and enjoy a drink together afterwards.
